PROPOSAL TO OCCUPY FACTORY NO. 108

Forek Institute of Technology is currently occupying five(5) MEGA factories on which we have established the five campuses for both training and trade testing. We are currently accredited to train and Trade Test Electricians, Welders, Bricklayers, Painters, Plasterers & Tilers and Plumbers. We look forward to expanding our scope to include the Carpentry trade.

Forek Institute of Technology hereby proposing to occupy Factory No. 108 to establish a training centre for both training and trade testing for the Carpentry Trade.

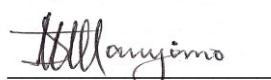

Please note that the factory was burnt down some two years back and cannot be put into any use in that state it is now but we are confident that we can establish a Carpentry training centre right there. We believe that this will also open up employment opportunities for the local people and help decrease unemployment rate in the Mpumalanga province at large.

Our request to MEGA is that we be granted the permission to immediately occupy factory 108 and start with the work to build the training facility right away.

We envision this training centre to be in existence for the long-term as long as the company exists. Our wish is to be given a 99-year lease so as to give us more time to fully realise our vision.

We appreciate your support as always and hope that you will find this proposal in order.

Kind regards

Mr T. Manyimo
Campus Manager
